SUMMARY

Forward-thinking Computer Science and Engineering student equipped with robust proficiency in HTML, CSS, JavaScript, and Java. Engineered multiple responsive front-end applications and user-centric projects. Passionate about leveraging emerging technologies to architect innovative solutions and deliver exceptional, dynamic user experiences.

EDUCATION

Kingston Engineering College *Vellore, TN, India*
Bachelor of Engineering in Computer Science and Engineering *Expected 2027*
CGPA: 8.41/10.0

Core Coursework: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Cloud Computing, Operating Systems, Computer Networks.

Sri Vivekananda Matric.Hr.Sec. School *Ambur, TN, India*
Higher Secondary Certificate (HSC) | Biology Maths Group | Percentage: 80% *April 2023*

EXPERIENCE

Strydo Technologies Pvt. Ltd. *June 2026 - July 2026*
Full Stack Development Intern *Vellore*

- Developed responsive web interfaces using HTML5, CSS3, and JavaScript, focusing on usability, responsive layouts, and improved application functionality across different screen sizes.
- Implemented full-stack development tasks by integrating front-end components with backend services, and contributed to feature implementation, debugging, testing, and optimization while following practical version-control workflows.

PROJECTS

Multi-Language Code Plagiarism & Logic Contradiction Engine | React, Node.js, Express, MongoDB, FastAPI, Java | GitHub *September 2026*

- Built an explainable code-analysis platform that detects structural similarity and logic contradictions in Java and Python student submissions by parsing both languages into a shared AST-based intermediate representation.
- Engineered a Node.js/Express API gateway orchestrating Python (FastAPI) and Java microservices for cross-language structural comparison, known-algorithm fingerprinting, and Python-based logic contradiction detection.
- Implemented role-based Student/Tutor workflows with Clerk authentication, a Monaco code editor, a side-by-side diff viewer, an interactive similarity graph, and Gemini-powered human-readable report generation, backed by MongoDB.

Ridego – Ride Booking & Tracking Platform | HTML, CSS, JavaScript, Node.js | GitHub *August 2026*

- Built a full-featured ride-hailing web platform spanning signup/login, ride booking, live tracking, payment, and an admin dashboard for managing operations.
- Developed a Node.js backend to handle booking, live-tracking, and payment logic, integrated with a multi-page HTML/CSS/JavaScript frontend.
- Designed a responsive, user-centric interface across booking, dashboard, and tracking screens to deliver a smooth, end-to-end rider experience.

ACHIEVEMENTS

Technical Events: Clinched 1st Prize in the Tech Talks Technical Event and secured 2nd Place in the Project Expo for innovative project delivery and effective technical presentation.

NPTEL Certification: Achieved a prestigious Gold Medal in the 'Programming in Java' certification, scoring an exceptional 91%.

SKILLS

Languages: JavaScript (ES6+), TypeScript, Java, HTML5, CSS3

Frameworks: React.js, Node.js, Express.js, Bootstrap, Tailwind CSS

Databases & Tools: MongoDB, Git, GitHub, RESTful APIs, VS Code
